Joint Exercises – IO Lessons Learned

Participation

- Bench is not deep
- Participation in planning and TO development is essential

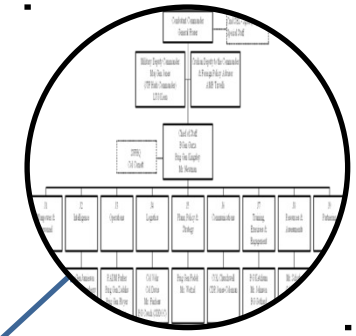
Mind-set

- Operations (non-DoD) vs. Planning (DoD)
- Training audience vs. training aids

Relationship

- DoD likely in support role
- Non-crisis synchronization key to unity of effort during crisis

Operation Unified Response – IO Lessons Learn



- Full participation by DoD, Interagency, and international partners necessary
- Consider an "augmented" command during future training events

OPERATION UNIFIED RESPONSE
JTF-HAITI

- DoD requires a modular/expeditionary capability applicable to sustainment, C2, medical, and security force projection

- Theater Security Cooperation is essential
- Knowledge of theater & environment, and established relationships with key leaders enabled operations
